## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 103(e) as being unpatentable over Lui et al U.S.

Publication Number 2001/0049499 A1.

Lui et al describes a tearable hemostasis valve comprising a valve body (10), a first grip tab (40) attached to the valve body at a first point, a second grip tab (32) attached to the valve body at a second point, a score line (22) on the valve body between the first and second points, a first membrane (112) disposed within the valve body bonded to and integral to the valve body; and a snap-fit arrangement coupled to a distal end of the valve body (122) , wherein the snap-fit arrangement is adapted to couple onto an annular hub of a tubular medical device (23, see fig 34).

Moreover, Lui et al discloses that the membrane (112) comprises a material of a first durometer (Paragraph 7) with a score (29) and the valve comprises a material of a second durometer (Paragraph 12) and the second durometer is higher than the first. Additionally Lui teaches that the valve further comprises a second membrane (28) disposed within the valve body, parallel to the first membrane and that two membrane are self-sealing.

***Response to Arguments***

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
